

Regenerative Medicine and Human Genetic Modification

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.
(Mitchell Kuhn III)

REGENERATIVE MEDICINE AND HUMAN GENETIC MODIFICATION

To save **Regenerative Medicine and Human Genetic Modification** eBook, remember to refer to the web link below and save the file or gain access to additional information which are have conjunction with REGENERATIVE MEDICINE AND HUMAN GENETIC MODIFICATION ebook.

Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. First Genetically Modified Babies Born, read the news headline. While not technically examples of genetically modified humans, the fact is when the babies were genetically fingerprinted they had the genes from two mothers and one father, which would alarm most people. One of the scientists involved said this is child s play, a mere tweaking of the reproductive process. Imagine before you Tinker Toys or Legos of all different sizes, shapes and colors. Imagine those pieces are actually genes from insects, plants, animals and people that can be used interchangeably to provide humans characteristics only comic book superheroes possess. Scientists have already taken the gene that provides the jellyfish its green color and inserted it into the DNA of a white rabbit to create a green rabbit. Scientists have taken the genes that enable spiders to make webbing and combined them with a goat s DNA as a way for the goat to make spider silk, a strong new fiber. We can do similar things with human DNA. Genomics provides us the equivalent of the Application Program Interface (API) for each human. Genomics, genetic engineering, embryonic stem cells, and nuclear transfer (cloning) independently have great promise and peril for us. There are numerous similarities between computer programing and genetic programing or genetic modification. Instead of programing with zero s and one s, we use C, T, A, G. We can reprogram DNA, cells and genes. The excitement with these new technologies is we can more effectively treat chronic diseases such as Parkinson s disease, osteoarthritis, osteoporosis, age-related macular degeneration, and atherosclerosis, which accounts for over 75 of medical costs. There are over 3,000 genetic diseases such as...
