

# Handbook of Sensory Physiology

By Held, R. / Leibowitz, H. W.

Book Condition: New. Publisher/Verlag: Springer, Berlin | This volume was designed to focus on the problems of perception and originally was to have been solely edited by Professor Hans-Lukas Teuber who was a member of the editorial board which initiated production of the Handbook. Accordingly, he issued invitations to a number of researchers in perception asking them to contribute chapters written in a style described in his words: "... I hope that no author will feel compelled/strained to undertake a major search of the literature: he could instead, on an area in which he has been quite active himself, and where most of the issues are immediately obvious to him. In this way, the writing of the chapter should be enjoyable rather than a chore... it should result in a personal account of the state of a given area rather than in an encyclopedic treatise... the field deserves this sort of summary review, particularly (if it is pointed toward the future and speeds the convergence of developments in sensory physiology and psychological studies of perception, " With the growing burden of national and international commitments including departmental headship, Professor Teuber...
