The design, prepared by the architects Woo Williams, proposes a central courtyard enclosed by residential structures of 10 stories on Washington Street and up to four (4) stories on Oak Street, Maple Place and the Parcel division line. Above-grade parking is currently planned off-site; however, if this plan proves not feasible, consideration would be given to a one-level below-grade parking garage. The actual depth of each borehole will be determined in the field by our resident engineer. Drilling and sampling will be in accordance with all current applicable ASTM and professional standards. Where clayey, cohesive soils are encountered, thin-walled tube samples will be taken. Split-spoon samples will be taken at representative strata. Samples will be placed in sealed Jars and labeled showing the boring number, sample number, sample depth, number of blows per six-inch increment required to drive the split spoon sampler, and sample recovery. Rock core will be obtained in one (1) borehole if deemed appropriate and placed in core boxes. In addition, field vane shear tests will be performed to correlate laboratory-determined shear strength parameters if...
