## Differential Models: An Introduction with MathCAD

By Alexander Solodov

Springer. Hardcover. Book Condition: New. Hardcover. 221 pages. Dimensions: 9.4in. x 6.3in. x 0.7in. Differential equations are often used in mathematical models for technological processes or devices. However, the design of a differential mathematical model is crucial and difficult in engineering. As a hands-on approach to learn how to pose a differential mathematical model the authors have selected 9 examples with important practical application and treat them as following: - Problem-setting and physical model formulation- Designing the differential mathematical model- Integration of the differential equations- Visualization of results Each step of the development of a differential model is enriched by respective Mathcad 11 commands, today's necessary linkage of engineering significance and high computing complexity. To support readers of the book with respect to changes that might occur in future versions of Mathcad (Mathcad 12 for example), updates of examples, codes etc. can be downloaded from the following web page [www.thermal.ru](http://www.thermal.ru). Readers can work with Mathcad-sheets of the book without any Mathcad by help Mathcad Application Server Technology. This item ships from multiple locations.
